

QED-2424

Quality Engraving & Design, Inc. (QED) manufactures its annunciators in both directory and graphic styles. They can be mounted either flush or surface

There are two types of enclosures available. The first one is a continuous hinge design that allows for convenient removal and re-assembly of the front panel. The second one is a traditional picture frame design in architectural gray aluminum without a hinge.

There is a key lock or hidden screw construction to provide tamper resistance.

Annunciator models include:

- > Smoked plexiglas--White screened graphics, backlit, protected by a layer of non-glare Plexiglas
- > Micarta--Black, Red or White
- > Various Metals-- Stainless Steel, Aluminum, Brass or Bronze
